

Air 1 is feel good music. It is music with a message lost on a generation, but the music played is compatible to today's generation. That is how I came to become an avid listener. This station gives kids/teens/young and old adults a station where nobody is pimpin someones ho or selling crack on the corner. I truly believe that music influences people in some minute way. I would rather listen to Air 1 than any other station on the dial. Please do not rule in favor of big business and give people an out to todays trash music. Thank you.
